Treasurer's Report:

Website:

Still working on the online scoring application, should be done by next CC. Some Key features:

- Will replace the current data entry and viewable results.
- Will integrate into the website so that anyone can be assigned permission to enter scores without help from a web admin.
- Can easily make name corrections to fix misspellings.

The next project will be to replace the Access membership database with an online application. The idea will be the same, that anyone can be assigned permission to work in it or generate reports from it, instead of putting all the membership responsibility on one person.
